## Rural Entrepreneurship in India

Entrepreneurship can be seen as an inventive and imaginative retort to the globe and a capacity to perceive, start and endeavor an economic prospect. A business visionary is a pioneer who presents something new in an economy. Entrepreneur is doing things that are by and large not done in the standard course of business. To do the things in a better and new way is the motive of an entrepreneur. The businessman who is working in a routine manner cannot be an entrepreneur. Business enterprise the way toward making esteem through giving an extraordinary mix of assets alludes to the utilization of an opportunity, which requires an entrepreneurial demonstration and an entrepreneurial operator. Entrepreneurial activity to conceptualize and execute a thought, procedure of item serve or another business has inferred. Entrepreneurship plays a vital role in the development of rural areas. Entrepreneurial orientation in rustic areas is based on motivating local entrepreneurial endowment and successive growth of home-grown companies. The development and growth of rural areas help in generating self employment, resulting in spreading industrial and economic activities on larger scales and makes maximum utilization of the local labour as well as locally available raw materials. Now-a-days Rural Entrepreneurship has become the big opportunity for those people who have shifted to urban areas from rural or semi-urban areas. “India lives in villages and its true spirits lives in rural areas”- Mahatma Gandhi. 3/4th of India's population is residing in rural agriculture and other allied activities for their good example of entrepreneurship because it process, risk, marketing, and inputs etc. which are the components of a business or enterprise.

## Higher Education in Rural Education

Under the Ministry of Education, Government of India strives to promote resilient rural India through Higher Education interventions. It designs, develops and promotes curriculum inputs for higher education programs offered by Universities and Autonomous Institutions in India. The higher educational streams of focus include: Rural Studies, Rural Development, Rural Management, Social Work and Education. The curriculum inputs are both theoretical and practical field-related relevant to rural India.
